# 1 Preface

This document describes the additional parameters required when using GUL within the UK Regulated Market.

### 3 Background

Gameflex Universal Launcher provides Operators with a single Url to launch any game within the Gameflex Platform.

When choosing to integrate Operators may choose to provide their own Regulatory Dialogs or use the built-in functionality provided by Gameflex.

When using the Gameflex Regulatory Engine additional parameters are required to ensure the user experience is compliant against the market requirements.

## 4 UK Regulations

Gameflex handles the following regulations

- Reality Check
  - Player should receive a regular reality check
  - Dialog must include options for the player to continue or leave the game and should also provide a link to their game history.
- CMA
  - Player must be made aware when playing with restricted (bonus) funds.
  - Dialog must include a link to the Operator Website bonus terms & conditions area.
  - The CMA dialog is displayed when:
    - Game is launched and player is playing with restricted funds
    - Player switches to restricted funds during game play
  - An additional dialog is displayed when the player switches back from restricted to unrestricted funds.

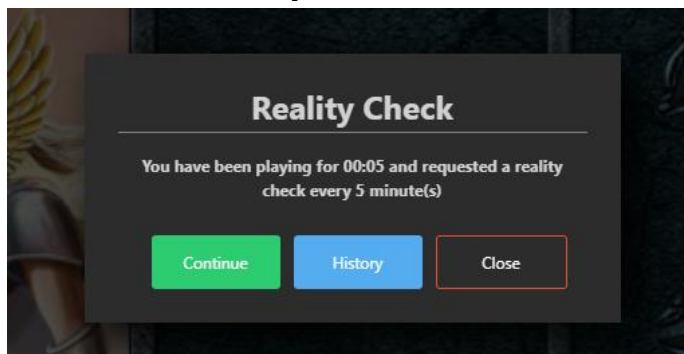

### 4.1 Universal Launcher Parameters

In addition to the standard launch parameters the following are mandatory and validated when launching games for a UK configured brand within Gameflex. These parameters are not required if an operator has disabled the Gameflex Regulation Engine using **regulationsenabled=false**.

#### 4.1.1 Reality Check

Name	Type	Example	Comments
reg_sessionduration	Integer	1800	Duration, in seconds, since the Player logged in to their session.
reg_interval	Integer	3600	Interval, in seconds, Player has requested for each reality check.
reg_gamehistoryurl	Url	https://www.operator.com/game-history	Url to the players game history or account area located on the Operator Website.
reg_lastaccept	Integer	150	Duration, in seconds since the player last accepted their Reality Check on the Operator Website.  <i>OPTIONAL – can be omitted if the Operator Website cannot track the last accept time.</i>

##### 4.1.1.1 Example

## 4.1.2 CMA

Name	Type	Example	Comments
reg_bonusurl	Url	https://www.operator.com/bonus-tc	URL to the bonus terms and conditions.

### 4.1.2.1 Examples
