S

Hello,

Here is the information for the Upay set up.

Let me know if you need anything else,

Best regards,

Montse M.

Hello Montse,

Here are the test API credentials for TOFT:

KEY: c3411bb0a4f7fd3b  
Secret: 3bac8271a332b777

Here are the links which you are going to need for the integration and user frontend:

<https://sandboxauser.upaycard.com>  
<https://sandboxapi.upaycard.com>

Here are your test users. One business user who would be you and 3 personal for your sponsored users and one additional BTC user for bitcoin testing.  
All of them have some test money in their accounts and cards assigned to their accounts.

Business User: BusinessTest64725  
Password: 6778765  
Account USD: 1784272  
Account BTC: 1785280

Personal User1: spTest647251  
Password: 3563683  
Account USD: 1784274  
Account BTC: 1785281

Personal User2: spTest647252  
Password: 9822852  
Account USD: 1784275  
Account BTC: 1785282

Personal User3: spTest647253  
Password: 6955864  
Account USD: 1784276  
Account BTC: 1785283

PersonalUser4: spTest693264\_BTC  
Password: 96459831  
Account BTC: 1785562

Key codes are attached for all users.

Sincerely,

Lydia W.
